

# CANBUS KIT

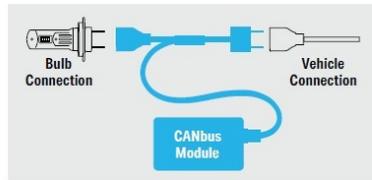

## Suitable for Fast Fit LED Headlight Kits

- **Plug and Play**
- **100% essential on vehicles listed**
- **Anti Flickering**
- **Remove Dashboard errors**
- **High Beam indicator supported**

- Some vehicle electronic systems may conflict with the LED bulb. There are a limited number of vehicles whose electronic systems may require the addition of a CANbus unit during installation. The CANbus unit will allow the vehicle's electronics to accept the LED bulb into its system
- Many vehicles may not require a CANbus module when installing LED headlight kits, however there are a few vehicles that have been confirmed will require the fitting of a CANbus module:

### CanBus Kits must be fitted to these vehicles
