

TURTLE WAX® HEADLIGHT LENS RESTORER KIT

DESCRIPTION

Turtle Wax® Headlight Lens Restorer Kit dramatically restores dull, yellowed headlights to like-new condition in minutes. Three multi-stage wet restoration pads focus on deeper discoloration and scratches to restore the lens to like new condition.

FEATURES

Lens Clarifying Compound quickly removes surface discoloration

New sealing wipe helps protect from future yellowing and discoloration

Designed to remove medium oxidation and yellowing to improve headlight appearance to like-new condition

Superior results without the need for a drill or power tools

WHERE TO USE

Suitable for all automotive clear plastic headlight and taillight lenses, or for removing scratches from clear plexiglass, plastic windows or other translucent plastics. Also great for Motorbike helmets.

HOW TO USE

1. Thoroughly clean headlight lens and use masking tape to protect nearby painted surfaces.
2. Apply Lens Clarifying Compound to one lens at a time. If not fully clear, apply included spray lube and use Restoration Pads on problem spots.
3. Use Lens Sealing Wipe to add a protective layer.
