Introduction

Thank you for purchasing the Gator GHDVR82W FULL HD 1080P WiFi Dash Cam. Please ensure that you have read the product manual and instructions in full, prior to installation and use. Failure to do so may result in product failure/damage or incorrect operation and therefore impact the product performance.

Product overview

The Gator GHDVR82W Dash Cam has been designed to provide high definition recordings of your trips for security and evidence in the case of an accident. The DASH CAM simply mounts to the windscreen and records footage onto a Micro SD memory card. It has built-in WIFI and interfaces with your smartphone. It transfers the user interface to the phone via the Gator Dash Cam APP. It has a G-sensor with adjustable sensitivity and loop recording functionality.

Product features:

- FULL HD 1920x1080 @ 30FPS
- 152 Degree HD wide angle lens
- WiFi enabled (2.4Ghz)
- WiFi Via free App to Smartphone
- Hand gesture photo function
- Time and date stamp
- G-Sensor function
- GPS data recording (optional GPS7282W req)
- Mini USB interface
- Seamless cycle loop recording
- Super capacitor works in extreme temperature & saves last recording once power is disconnected
- Adhesive car mount
- Built-in MIC
- 12V in-car USB charger
- Supports Micro SD memory card up to 64GB, class10

Package components:

- Gator GHDVR82W Dash Cam
- Mounting Bracket
- USB to Micro USB
- GPS (GPS7282W optional)
- Car Charger
- GHDVR82W User Guide

GPS optional accessory: GPS7282W

The GATOR GPS antenna enables the user to connect directly to the DASH CAM for power and to use the GPS tracking and recording function via the App. The Gator GPS7282W GPS antenna is sold separately.
Product structure:

- Camera
- MIC
- Gesture photo function
- LED
- Speaker
安装防撞摄像头（Dash Cam）

1. 将胶粘底座插入DASH CAM的固定点。
2. 将设备固定到清洁的挡风玻璃上，视线未被遮挡（推荐放在后视镜附近）。不要安装在安全气囊或工作范围内。
3. 将Micro SD卡插入DASH CAM。
4. 将Mini USB端插入DASH CAM的Mini USB接口/充电点。将USB充电端插入USB插头适配器，将适配器插入车辆12V电源插座。
5. 调整底座并旋转摄像头方向以获得最佳视野。确保车辆发动机罩的¼从屏幕底部可见。
6. 将车辆点火开关调至附件，DASH CAM将自动开启，您将听到一声蜂鸣声。
7. 红色LED灯开始闪烁，记录将开始。
8. 当DASH CAM通过APP正确与您的智能手机配对时，自动显示绿色LED灯。
9. 对于DASH CAM，它必须从充电适配器接收电源。一旦电源被移除或关闭，DASH CAM将保存当前文件并关闭。
Fixing the Dash Cam

Indicator lights

1. When the red LED is flashing, the Dash Cam is in recording mode.
2. When the green LED is on, the Dash Cam has been successfully paired with your Smartphone.

Hand gesture photo function

When you wave your hand in front of the gesture photo sensor, the Dash Cam will make a click sound and automatically takes a photo.

Downloading the DASH CAM WiFi APP

On your Smartphone search Gator Dash Cam APP. For iPhones search the APP Store or for Android devices via Google Play.
Pairing the Dash Cam to a Smartphone

On the Smartphone to the Gator Dash Cam APP and press the Pair icon. This will go to your WiFi settings and display all devices for connection. Select your Dash Cam model. Enter the password 12345678. Join then Launch Dash Cam APP
DASH CAM interface

Once paired to your DASH CAM select the connect icon to access functions.
DASH CAM APP functions

DASH CAM
1. To take a picture press white button in the centre
2. To access my Dash Cam videos press video icon
3. To access Dash Cam settings press settings icon

Factory Reset
To hard reset the device in the case of a system jam or crash. Insert fine point paper clip into reset hole next to Micro SD card input

Version of the APP, Version of firmware, Language and Speed unit settings

Resetting DASH CAM
To hard reset the device in the case of a system jam or crash. Insert a fine point paper clip into reset hole next to Micro SD card input

DASH CAM Glossary

Micro SD Slot:
Where the Micro SD card is inserted (Max size is 64GB Class 10).

USB Interface:
The USB charging adapter is used to power the DASH CAM with the Micro USB cable.

G-sensor Function:
The G-sensor function activates in the case of a car accident by determining the gravitational acceleration (1g = 9.8 meters/second^2). When this function activates, the DASH CAM will take a picture.

Super capacitor:
This allows for the Dash Cam to be used in extreme temperatures and saves the last recording once power is disconnected.
**Ignition Auto Power On/Off:**
Once power is connected to the device (ie: when the vehicle's ignition is turned on), the DASH CAM will automatically turn on and start recording. When the power is disconnected, or car is turned off, the DASH CAM will automatically save the file and shutdown.

**MIC:**
Audio receiver for video recording.

**Resolution:**
Resolution is 1920x1080 @ 30P

**Record Time (Loop):**
This feature allows the DASH CAM to record over the oldest recorded files once the card is full. The card records video in 3 minute files. If you want to keep any of the files it is best to upload them via the APP to your Smartphone.

**Date Stamp:**
This feature will stamp the date and time on all your footage

**Mute microphone:**
Turns microphone recording sound on or off. If you want to stop the DASH CAM recording sound in the cab of your vehicle, set this feature to ‘off’. The microphone can be muted by the video settings menu of the APP

**WDR (Wide Dynamic Range):**
Wide Dynamic Range can allow for better quality footage in areas where both bright light and no light are present.

**Language:**
Allows you to choose from a selection of languages that include: English, Simplified Chinese, Traditional and Japanese.

**Format:**
This feature allows you to format/delete all the files off your micro SD card and also reinstaller your EVENT(SOS locked files) and NORMAL(Video and jpegs) directories on your Micro SD card.
Instructions video and photo playback (APP browser interface)

To view your files go to the gallery menu of the APP. Click on the video or photo tab, select your file and press on the download icon. This will download the file from the DASH CAM to your Smartphone for viewing. Alternatively remove the card from the reader and plug card directly into your computer to access files.

GPS logger instructions with optional (GPS7282W cable)

The GPS data is automatically saved to the video files. In order to see the GPS data in the video files, you will need to download from the link below..

ATTENTION: To avoid any possible GPS signal interference, make sure the DASH CAM is away from any other car audio equipment.

Trouble shooting guide

Under normal operating conditions, if there are problems with the device, please refer to the following methods to resolve.

**Cannot take pictures or record video?**  
Please check whether there is enough space on the micro SD card or internal storage.

**Stopping automatically while recording**  
Due to the high amount of HD video data being recorded, please use a high-speed micro SD card. To tell if you have the required high speed card, check if it has the ‘Micro SDHC’ logo on the SD card and 8GB class 10 or above is recommended. Make sure that your card is labelled Micro SDHC and not Micro SDXC as SDXC cards will not work with this DASH CAM.

**Fuzzy/dirty image**  
Please check if the lens is filled with dirt or fingerprints and clean carefully. Please clean lens with cloth before shooting.

**The DASH CAM is jammed or not responding**  
Please reset the device by pushing in the reset button on the underside of the DASH CAM.

**Why is the DASH CAM not turning on in the car?**  
Please check and make sure that there is power in the cigarette lighter socket of your car.

**Micro SD card not recognised by DASH CAM**  
Format card in the DASH CAM’s menu setting’s before use.

**A coloured tinge showing up in the video?**  
Make sure to peel off the transparent protective sticker on the front of the DASH CAM's lens.
Safety information & warnings

- Do not use the DASH CAM in damp working conditions; the DASH CAM is not waterproof.
- Do not try opening the shell or trying to repair the DASH CAM by yourself. If the accessories for the DASH CAM have any problems, please take it to an authorised repair agent for repair.

- Do not use a chemical substance, cleaning solvent or cleaner to clean the DASH CAM, please use a moist soft cloth if you would like to clean the DASH CAM.
- Do not use the DASH CAM under conditions where dust is present.
- Please pay attention to cleaning the lens surface, use a moist soft cloth to clean the lens before use, to avoid poor video footage.
