

Versatile Folding Booster

FEATURES

- Foldable for easy storage
- Light weight portable design
- Arm Rests for child's comfort
- Removable and washable cover
- Injection moulded

FEATURES IN DEPTH

Energy Absorption & Design

Hundreds of hours of design and engineering went into the development of the Versatile, an injection moulded plastic booster seat with a full backrest and side impact head protection, which weighs in at less than 2kg.

The Versatile Folding Booster passes the same Australian Standard criteria that all other booster seats sold in Australia must pass, even those with top tether straps.

SUITABILITY

The Versatile Folding Booster is a unique booster seat designed for ease of use and portability. Its super light weight, which makes it fantastic for surprise child guests, grandkids, nieces and nephews, and is especially good for childcare / daycare centres with a large range of different child ages and sizes. The folding feature, in conjunction with it's light weight and built-in carry handle make storage and transport quick and easy.

FORWARD FACING

(Forward Facing) Suitable for children from 4 years of age to approximately 8 years* of age.

PRODUCT SPECIFICATIONS

Product weight: 1.8 kg

Dimensions: 40W x 36D x 79H cm

Folded dimensions: 40W x 65L x 22H cm

Colour: Black
