with 4.5 ft hardwire

TECHNICAL SPECIFICATION

- Working voltage: DC 12V Only
Effective Lumens: 300
Maximum amperage draw: 0.5A at 12V

INSTALLATION

1. Choose your desired location.
(☼ – see suggestions above)
2. Clean surface thoroughly with isopropyl alcohol. Dry completely.

INSTALLATION Cont.

3. Peel off the 3M™ tape backer and carefully apply to the desired area.

4. There is one mounting slot on each side of the Cab LED Light. You can also secure the Cab LED Light on your truck by drilling 2 self-tapping screws through the mounting slots. (Self-tapping screws not included in this package)
5. Run the leading wires to the rear tail light or hardwire them into the power source. (either the fuse box or a light switch). Connect the red wire to a (+) positive power source and black wire to a (-) negative power source. May need to add a switch with wiring to constant power source to turn it on and off.

Caution:

- Hot surface of the Cab LED Light may cause injury.

Note:

- For use with 12V power only.
- Suitable temperature for 3M™ tape installation is 70°F (21°C) or above.

WARNING
