

Versatile Folding Booster

FEATURES

- Foldable for easy storage
- Light weight portable design
- Arm Rests for child's comfort
- Removable and washable cover
- Injection moulded

FEATURES IN DEPTH

Energy Absorption & Design

Hundreds of hours of design and engineering went into the development of the Versatile, an injection moulded plastic booster seat with a full backrest and side impact head protection, which weighs in at less than 2kg.

The Versatile Folding Booster passes the same Australian Standard criteria that all other booster seats sold in Australia must pass, even those with top tether straps.

SUITABILITY

The Versatile Folding Booster is a unique booster seat designed for ease of use and portability. Its super light weight, which makes it fantastic for surprise child guests, grandkids, nieces and nephews, and is especially good for childcare / daycare centres with a large range of different child ages and sizes. The folding feature, in conjunction with it's light weight and built-in carry handle make storage and transport quick and easy.

FORWARD FACING

(Forward Facing) Suitable for children from 4 years of age to approximately 8 years* of age.

PRODUCT SPECIFICATIONS

Product weight: 1.8 kg

Dimensions: 40W x 36D x 79H cm

Folded dimensions: 40W x 65L x 22H cm

Colour: Black

Roamer II

FEATURES

- Air Cocoon Technology™ (A.C.T.)
- Adjustable headrest pad
- Armrests for child's comfort
- Removable and washable pillow
- Removable headrest, shoulder strap and crotch buckle pads

FEATURES IN DEPTH

Air Cocoon Technology™

Air Cocoon Technology™ (A.C.T.) enhances protection by dramatically reducing the impact forces during a crash. A.C.T. utilises a layer of air held inside the entirety of the child restraint shell, offering an increased level of protection across the entire surface area of the restraint. Your child is quite literally cradled in a cocoon of air, offering a true 180° of protection to your child's vital organs.

Independently Locking Buckle

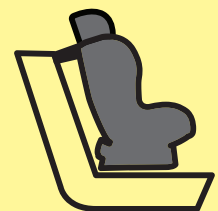

The Roamer II features a new Independently Locking Buckle. Unlike traditional buckles that generally require both tongues to be inserted before engaging the lock, the Roamer II features a new buckle that independently locks each buckle tongue separately. This helps eliminate situations where a buckle isn't engaged and pops out.

SUITABILITY

The Roamer II is a Forward Facing child restraint and can be used with the in-built harness from approximately 6 months through to 4 years then from 4 to approximately 8 years with the car seat belt.

Forward Facing
approx.
6mths - 4 yrs old

Booster Mode
approx.
4 - 8 yrs old

PRODUCT SPECIFICATIONS

Product weight: 6.3kg

Dimensions: 47.5W x 43D x 78H cm

FEATURES

- Compact space saving design – only 44cm wide
- Removable padded inserts
- Removable and washable covers
- Air Cocoon Technology™ (A.C.T.)
- Forward Facing multiple recline positions

FEATURES IN DEPTH

Compact

The Serene measures at an incredibly narrow 44cm across at its widest point and a short rearward facing depth.

Air Cocoon Technology™

Air Cocoon Technology™ (A.C.T.) enhances protection by dramatically reducing the impact forces during a crash. A.C.T. utilises a layer of air held inside the entirety of the child restraint shell, offering an increased level of protection across the entire surface area of the restraint.

Independently Locking Buckle

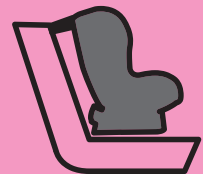

The Serene features a new Independently Locking Buckle. Unlike traditional buckles that generally require both tongues to be inserted before engaging the lock, the Serene features a new buckle that independently locks each buckle tongue separately.

SUITABILITY

The Serene is an A2 Rearward Facing child restraint seat, allowing for rearward facing to a large 12 month old, and then forward facing to a large 4 year old.
