A premium tacky-
adhesive multi-purpose
EP waterproof grease
designed to "stay in
place" in automotive,
industrial, heavy-duty
fleet, farm equipment,
and marine
applications.

MOREY'S SUPER RED EP 2 WATERPROOF GREASE

MOREY'S SUPER RED EP-MP2 GREASE is a premium, heavy duty, EP Multi-purpose grease fortified with polymers, tackiness additives, high viscosity base oils, rust, and oxidation inhibitors. Its' advanced formulation provides a product unsurpassed in adhesive and film strength quality. This grease is designed to "stay in place" under the most severe operating conditions to resist water washout and wear from shock loading under the worst operating conditions of water-dirt-mud.

Features & Benefits:

- Adhesive-tacky grease that stays in place.
- Unexcelled water wash-out resistance.
- Excellent protection against shock loading wear.
- Rust and corrosion inhibited to protect metal surfaces.
- Extreme pressure protection. Exceeds 70lb/32kg Timken OK Load Test.
- Dyed distinctive red colour to better detect defective bearing seals.
- Grease "stays in place". Less frequent regreasing required.
- Oxidation inhibitors permit operations from -20°C to 160/170°C for extended periods.
- NLGI Certified GC-LB in wheel bearings and chassis applications.
- NZFSA Approved C 11.
