

Dupli·Color®

AUTO SPRAY PAINT CATALOGUE

3 STEPS FOR A PERFECT FINISH

How to find your colour?

Dupli-Color automotive paints are acrylic based lacquers available in factory matched colours and general purpose items. This booklet contains the full list of car manufacturers' colours covered by the range.

To find the matching Dupli-Color automotive paint for your car:

1. Look up the manufacturer of your car
2. Check the colour with year and manufacturer's own code number
3. Note the Dupli-Color colour part number
4. Note the recommended Dupli-Color primer part number
5. The cap colour of each Dupli-Color automotive paint shows the approximate colour of the contents.

ALL PAINTS SHOULD BE TESTED IN AN INCONSPICUOUS AREA AS SHADES MAY VARY.

USE YOUR CAR MANUFACTURER PAINT CODE
AS THE REFERENCE TO SELECT YOUR PAINT COLOUR.

Cannot find your paint in the Catalogue?

Our Spraymatch System has over 15,000 colours available. Spraymatch provides you with factory formula colours that deliver top of the line performance every time, even for advanced new colours. The result is a durable factory match finish from an economical alternative.

To find your nearest stockist of Spraymatch call: 02 4577 6977.

Your local stockist will custom mix your colour and custom fill any number of aerosols you need for your professional quality finish. Designed for the ultimate touch up for minor scratches to large jobs. Remember to apply Clear Coat over your repair if your car manufacturer specifies it.

IMPORTANT

FOLLOW CAN DIRECTIONS CAREFULLY. ALWAYS SPRAY
INCONSPICUOUS TEST AREA BEFORE COMMENCING JOB.
BEST APPLIED IN TEMPERATURES BETWEEN 15°C AND 30°C.
DO NOT USE DURING HIGH HUMIDITY.
HINTS ON SPRAYING TECHNIQUES AND PROCEDURES
ARE LISTED ON PAGE 2 OF THIS BOOKLET.

How to use Touch-Up Paints?

1. Paint in good weather only, 15-30°C and relative humidity less than 60%.
2. Surface to be sprayed must be absolutely clean and dry. Thoroughly remove all dirt, rust, oil, grease and silicone/polish/wash residue. Use degreasing solvent. Sand previously painted surfaces.
3. Mask surrounding areas to protect from overspray.
4. **Bare Metal Surfaces & Aluminium:** Spray with Etch Primer (fast drying & easy sanding) to re-establish original surface level. **Rust Areas:** Use Auto Zinc as an anti-rust primer that controls rust and seals the surface to protect against corrosion. (Colour coat should be applied within two hours or left for 48h.) **Plastic Surfaces:** Use Plastic Trim Primer prior to spraying a colour coat. Promotes adhesion to bumper bars and plastic body mouldings.
5. Shake can vigorously for two full minutes and after sound of agitator is heard (repeat at intervals during use to ensure paint remains thoroughly mixed).
6. Trial spraying on a similar surface to check colour match and spraying technique is suggested.
7. Hold can approximately 20-25cm from prepared surface and spray from side to side with light even strokes. DO NOT attempt to get complete coverage in one pass. Several light coats will prevent paint sag and runs. Allow 20 minutes between each coat. Each coat should be dry before re-coating. **Metallic Paints:** Overspray with 2-3 coats of Top Coat Clear to improve protection.
8. Allow 5-7 days for paint to harden, wash and polish the painted area.
9. After use, turn can upside down and spray until valve clears of paint. If spray-nozzle is clogged with excess paint, remove nozzle and soak in thinners for one minute.

Top Coat Clear or COB (Clear Over Base)

Top Coat Clear or COB is the top coat of a two part system consisting of a metallic base colour and clear top coat.

The system gives improved protection against UV radiation and airborne pollutants.

It applies to most metallics, all pearlescent, mica paints and fluorescent colours. The metallic, pearlescent and mica colours to which Top Coat Clear is applicable in the Dupli-Color range are marked in the book with a tick (✓).
The caps on the can are also marked COB.

Directions for using Top Coat Clear

BASE COLOUR

Spray as per directions on the can.

Note that appropriate primer should be used.

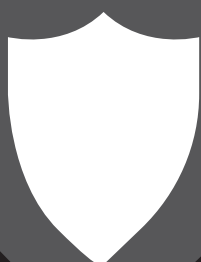

DS117/PS117 TOP COAT CLEAR HCT108-C CLEAR

1. Allow base colour to dry (20-30 minutes)
2. To achieve desired results several coats of Top Coat Clear will be required
3. Apply a light coat of Top Coat Clear and allow to dry for 20-30 minutes
4. Then apply additional full coats as required allowing each coat to dry for 20-30 minutes
5. Allow 7 days before waxing.

For hints on how to spray paint, fix nicks & scratches
and how to find the right paint match,

Dupli·Color®

**STEP
1**

1. PRIME

Primer	Product Code	Volume	Packaged	Description
Dupli-Color Scratch Primer Filler	DS116	150gm		Fills holes, gaps and cracks within the surface to leave a clean, smooth surface for re-painting. Recommended for filling light scratches and nicks, and minor surface imperfections.
Dupli-Color Spray Putty	DS0010	150gm		Fills holes, gaps and cracks within the surface to leave a clean, smooth surface for re-painting. Recommended for filling deep scratches and gouges, and major surface imperfections.
Dupli-Color Spray Putty	PS010	350gm		
Dupli-Color Grey Primer	DS105	150gm	Auto Spray	Fills holes, gaps and cracks within the surface to leave a clean, smooth surface for re-painting. Recommended for use when the final coat is a dark colour.
Dupli-Color Grey Primer	PS105	350gm	Auto Spray	
Dupli-Color Grey Primer	HCT107-C	12.5ml	Colourtouch Pen	
Dupli-Color White Primer	DS107	150gm	Auto Spray	Fills holes, gaps and cracks within the surface to leave a clean, smooth surface for re-painting. Recommended for use when the final coat is a light or pale colour.
Dupli-Color White Primer	PS107	350gm	Auto Spray	
Dupli-Color Red Oxide Primer	DS108	150gm	Auto Spray	To be used where red and orange topcoats are needed. Fills holes, gaps and cracks within the surface to leave a clean, smooth surface for re-painting. Recommended for use when the final coat is a shade of red or orange.
Dupli-Color Red Oxide Primer	PS108	350gm	Auto Spray	
Dupli-Color Plastic Trim Primer	DS115	150gm	Auto Spray	Gives strong adhesion for painting non-metal surfaces. Fills holes, gaps and cracks within the surface to leave a clean, smooth surface for re-painting. Recommended for use on bumper bars, plastic trims, plastic mouldings, and other non-metal surfaces.
Dupli-Color Plastic Trim Primer	HCT109-C	12.5ml	Colourtouch Pen	
Dupli-Color Etch Primer	DS125	150gm	Auto Spray	Used as a primer for ferrous and non-ferrous substrates where superior adhesion is required. Dupli-Color Etch Primer should be used prior to painting onto aluminium, copper, brass, zincalume, stainless steel, galvanised iron, and other non-ferrous metal surfaces. For best results, use Dupli-Color Scratch Primer Filler as an undercoat after using Dupli-Color Etch Primer, and then finish with a topcoat on the primed surface.
Dupli-Color Etch Primer	PS125	350gm	Auto Spray	
Dupli-Color Auto Zinc	DS113	150gm	Auto Spray	Fills holes, gaps and cracks within the surface to leave a clean, smooth surface for re-painting. Recommended for use when the final coat is a dark colour.
Dupli-Color Auto Zinc	PS113	350gm	Auto Spray

STEP 2

2. PAINT

**Refer to the vehicle colour guide
in the following pages.**

Use your vehicle paint code (usually located on the compliance plate in the engine bay) to identify the correct paint for your vehicle.
For best results use the appropriate primer to prepare the surface, and finish with **Dupli-Color Top Coats Clear** for maximum durability & protection.

Cannot find your paint in the Catalogue?

Our Spraymatch System has over 15,000 colours available. Spraymatch provides you with factory formula colours that deliver top of the line performance every time, even for advanced new colours. The result is a durable factory match finish from an economical alternative. To find your nearest stockist of Spraymatch call: 02 4577 6977. Your local stockist will custom mix your colour and custom fill any number of aerosols you need for your professional quality finish.

Designed for the ultimate touch up for minor scratches to large jobs. Remember to apply Clear Coat over your repair if your car manufacturer specifies it.

IMPORTANT

FOLLOW CAN DIRECTIONS CAREFULLY. ALWAYS SPRAY INCONSPICUOUS TEST AREA BEFORE COMMENCING JOB. BEST APPLIED IN TEMPERATURES BETWEEN 15°C AND 30°C. DO NOT USE DURING HIGH HUMIDITY. HINTS ON SPRAYING TECHNIQUES AND PROCEDURES ARE LISTED ON PAGE 2 OF THIS BOOKLET.

Top Coat Clear

Gives a protective coating to prevent fading, discolouring, scratching and general wear and tear.

Formulated with UV protectants to give resilience to sun and extreme weather conditions.

It also serves to increase gloss level of painted surfaces.
