DISC BRAKE PADS

MAKING WHEELS GREENER

EV-Hybrid Disc Brake Pads are AASA Leafmark™ Certified which means they use organic brake friction materials for minimal environmental impact. In addition, low particle emissions deliver cleaner wheels and long disc life. Featuring Bendix's exclusive Green Titanium Stripe, EV-Hybrid pads provide instant friction (no bedding-in required). Designed for quiet operation and low noise, EV-Hybrid pads are **specifically engineered for EV and Hybrid Vehicles.**

 **Low Environmental Impact**

 **Low Dust, Low Noise**

 **Formulated for EVs and Hybrids**

EV HYBRID

DISC BRAKE PADS

Specifically engineered for EV and Hybrid Vehicles, Bendix EV-Hybrid Disc Brake Pads use the latest Ceramic technology to meet the changing needs of EV braking systems.

Made from organic materials, Bendix EV-Hybrid disc brake pads ensure a low environmental impact while ensuring low dust and noise levels. This means low particle emissions when braking, resulting in cleaner wheels and longer disc brake rotor life.

The copper-free organic brake friction materials used in Bendix EV-Hybrid disc brake pads are certified to the Automotive Aftermarket Suppliers Association (AASA) 'N' rating. This rating confirms Bendix EV-Hybrid disc brake pads contain less than 0.5 percent of copper by weight and permits Bendix to use the AASA LeafMark™ 'N' icon.

Certification as 'N' rated under the AASA LeafMark™ backs Bendix's commitment to copper-free brake pads, to minimise environmental impact.

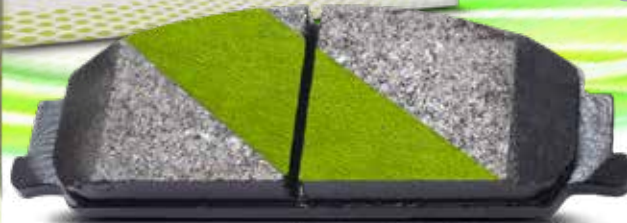

The AASA LeafMark™ for friction materials represents one of the most stringent environmental standards for brake materials and the Bendix EV-Hybrid material has been tested and accredited by an independent lab and certified to meet this high standard.

A further advantage of Bendix EV-Hybrid disc brake pads is that they incorporate the Bendix Green Titanium Stripe for instant friction without the need for bedding in the brakes on installation, saving both time and money for both the installer and the customer.

Available for popular brands such as Tesla, Toyota, Honda, Mitsubishi and Lexus.
