Dash Cams

Specifications

622
GW

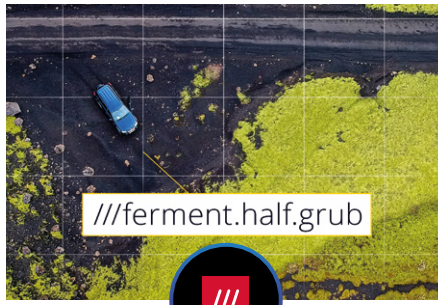

Nextbase Emergency
SOS built-in

Enhanced Night Vision

The 622GW includes a new light sensor with larger pixels to capture more detail. Switching automatically from day to night mode the 622GW has class leading recording, even in low-light conditions.

what3words

Three words that identify your precise global location, what3words can be the critical aid in the event of an incident, guiding the emergency services directly to you swiftly and accurately. This works even when you are offline.

Extreme Weather Mode

Fog is a major cause of incidents on the road, inbuilt algorithms allow your 622GW to enhance the footage providing the clearest possible image, vital for driving in extreme weather conditions.

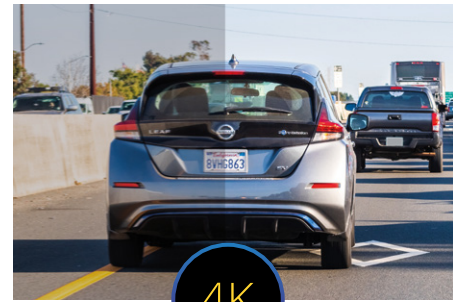

Image Stabilisation

The World's first Dash Cam with Digital Image stabilisation, giving you smooth and clear footage to help read finer details such as number plates.

Super Slow Motion

Super Slow Motion allows you to view 622GW footage at 1080p and 120fps, hugely important to capture finer details such as number plates, often essential to prove fault.

4K Image Quality

4K recording at 30fps is as good as image quality gets in a Dash Cam, with your Rear Camera Module still able to record in full HD. This quality is vital when wanting to capture finer details.

Resolution

4K @ 30fps
1440 @ 60fps
